Brainstorm & Idea Prioritization Template:

Brainstorming creates an open and supportive environment where every team member can actively participate in the creative thinking process to solve problems. It focuses on generating a large number of ideas rather than judging their immediate value, encouraging innovative and unconventional thinking. Team members collaborate by sharing and building upon each other's ideas, which helps in developing a wide range of creative solutions. This template can be used during brainstorming sessions to help teams explore their imagination and begin shaping ideas, even when they are working remotely and not in the same location.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

1

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

 5 minutes

PROBLEM

How might we [your problem statement]?

Key rules of brainstorming

To run an smooth and productive session

-  Stay in topic.
-  Encourage wild ideas.
-  Defer judgment.
-  Listen to others.
-  Go for volume.
-  If possible, be visual.

Step-2: Brainstorm, Idea Listing and Grouping

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

20 minutes

TIP
Add sub-themes to sticky notes to make it easier to find, organize, and categorize related ideas as themes within your mind.

After evaluating feasibility and impact, the team concluded that an **AI-powered Travel Itinerary Generator** would provide an efficient solution for trip planning. The system will generate **personalized travel schedules, recommend attractions, suggest hotels and restaurants, and provide budget-friendly travel plans** based on user preferences. Key solution themes include **AI-Based Itinerary Generation** and **Intelligent Travel Recommendation System**.

Step-3: Idea Prioritization

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

TIP
Participants can use their cards to sort at which stage ideas should go on the grid. The facilitator can confirm the grid by using the laser pointer holding the **Play** on the highest.
