Project Name	
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example: [\(Simplified\)](#)

Flow

1. User configures credentials for the Watson Natural Language Understanding service and starts the app.
2. User selects data file to process and load.
3. Apache Tika extracts text from the data file.
4. Extracted text is passed to Watson NLU for enrichment.
5. Enriched data is visualized in the UI using the D3.js library.

Example: DFD Level 0 (Industry Standard)

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Traveler (Mobile/Web User)	Registration	USN-1	As a user, I can register for the application by entering my name, email, password and confirming my password..	User account is successfully created and stored in database.	High	Sprint-1
		USN-2	As a user, I will receive a confirmation email after registration.	User receives confirmation email and can verify account.	High	Sprint-1
	Login	USN-3	As a user, I can log in using my email and password.	User is authenticated and redirected to dashboard.	High	Sprint-1
	Profile Management	USN-4	As a user, I can update my personal details such as name, preferences, and travel interests.	Profile updates are saved in the database.	Medium	Sprint-2
	Destination Selection	USN-5	As a user, I can search and select a destination for my trip.	System displays relevant destinations based on search input.	High	Sprint-1
	Travel Details Input	USN-6	As a user, I can enter travel details like start date, end date, budget, and number of travelers.	System accepts input and prepares itinerary generation.	High	Sprint-1
	Itinerary Generation	USN-7	As a user, I can generate a travel itinerary based on my selected destination and preferences.	System generates a structured day-wise itinerary.	High	Sprint_2
Traveler (Mobile/Web User)	View Itinerary	USN-8	As a user, I can view the generated itinerary including attractions, activities, and timings.	Itinerary is displayed clearly with day-wise plans	High	Sprint-2
Administrator	Manage Destinations	USN-12	As an admin, I can add, update, or remove travel destinations.	Destination data is updated in the system database.	Medium	Sprint-2
	Manage Users	USN-13	As an admin, I can view and manage registered users.	Admin dashboard shows user list and management options.	Medium	Sprint-2
