

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	06 Feb 2026
Team ID	LTVIP2026TMIDS90611
Project Name	Travel-Itinerary-Generator
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form Registration through Gmail Registration through LinkedIN
FR-2	User Confirmation	Confirmation via Email Confirmation via OTP
FR-3	User Login	Login using email and password Forgot password and reset password option
FR-4	Destination Selection	Search and select travel destination Display popular tourist attractions Show destination details and travel suggestions
FR-5	Travel Details Input	Enter travel dates, number of travelers, and budget Select travel interests (adventure, culture, food, etc.)
FR-6	Itinerary Generation	Generate day-wise travel itinerary Suggest attractions, hotels, and activities
FR-7	Itinerary Management	View itinerary Modify itinerary by adding or removing places Download or save itinerary

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The system should have a user-friendly interface so users can easily create travel plans.
NFR-2	Security	User data such as login credentials and personal information should be securely stored and protected.
NFR-3	Reliability	The system should generate accurate itineraries and function without system crashes.
NFR-4	Performance	The system should generate travel itineraries quickly with minimal response time.

NFR-5	Availability	The application should be available to users at all times with minimal downtime.
NFR-6	Scalability	The system should handle increasing numbers of users and travel data efficiently.
