

Functional & Performance Testing Template

Model Performance Test

Date	17 Feb 2026
Team ID	LTVIP2026TMIDS90611
Project Name	Travel-Itinerary-Generator
Maximum Marks	

Test Scenarios & Results

Functional Testing

Test Case ID	Scenario (What to Test)	Test Steps (How to Test)	Expected Result	Actual Result	Pass/Fail
FT-01	Home Page Load	Open the Travel Itinerary Generator application	Homepage loads successfully	Homepage displayed with input fields	Pass
FT-02	User Input Validation	Leave destination field empty and submit	System should show validation error	Error message displayed for unsupported format	Pass
FT-03	Destination Search	Enter destination (e.g., Paris)	System should recognize destination	Destination accepted	Pass
FT-04	Travel Preference Input	Enter travel dates, budget, interests	System should capture preferences correctly	Preferences saved	Pass
FT-05	Itinerary Generation	Click "Generate Itinerary"	System should generate a day-wise itinerary	Structured itinerary displayed	Pass

FT-06	Itinerary Display	View generated itinerary	Itinerary should show attractions and activities	Information displayed clearly	Pass
FT-07	Modify Itinerary	Change travel preferences and regenerate	Updated itinerary generated	Updated itinerary displayed	Pass
FT-08	Save/Download Itinerary	Click download/save option	Price difference, mileage difference, pros & cons	File downloaded successfully	Pass

Performance Testing

Test Case ID	Scenario (What to Test)	Test Steps	Expected Result	Actual Result	Pass/Fail
PT-01	Itinerary Generation Response Time	Enter travel details and generate itinerary	System responds within acceptable time	Avg 6–8 seconds	Pass
PT-02	Multiple User Requests	Simulate multiple users generating itineraries	System should handle concurrent requests	System handled requests successfully	Pass
PT-03	API Stability Time	Send request to AI API for itinerary generation	Stable response time	Avg 5–7 seconds	Pass
PT-04	Session Stability	Use application continuously for extended time	Session should remain active	Session maintained without crash	Pass
PT-05	UI Responsiveness	Navigate between pages and actions	UI should respond smoothly	Pages loaded smoothly	Pass
PT-06	System Reliability	Generate multiple itineraries repeatedly	System should not crash	Stable performance observed	Pass
