1. Purpose of Document

The purpose of this document is to describe the design, functionality, and implementation details of the **Travel Itinerary Generator** system. It provides an overview of the project objectives, system architecture, functional and non-functional requirements, and the technologies used in developing the application. This document helps stakeholders, developers, and users understand how the system works and how it generates personalized travel itineraries based on user preferences such as destination, travel dates, budget, and interests. It also serves as a reference for future development, maintenance, and improvements of the system.
